After discussion with my client, we would be amiable to executing a consent so long as the consent is limited in scope as defined by the workplan, the time for such sampling is pre approved by my client and access is limited to a one time round of sampling. If you find this acceptable please revise the agreement and forward it to my office for review.

Subject: Bales Mold Service

Mr. Nowotarski,

This will confirm our phone conversation in which I clarified to you that:

1) If your client wishes, U.S. EPA can provide it with a copy of the Agency's sampling workplan before the sampling event. This workplan should provide a general idea of the number and type of samples that

will be taken.

2) U.S. EPA will coordinate with your client concerning the actual sampling numbers and locations and will provide reasonable advance notice of the sampling date(s).

3) If your client wishes, it can limit to consent to access to cover solely this round of sampling.

Please confirm that with those clarifications your client will be willing to grant access premised on those understandings. After I hear back from you, I will provide a revised consent form for your client's signature. Thank you for your cooperation.
